

# Rockwood Church of Christ

## The Proclaimer

June 26, 2016

P.O. Box 416  
129 S. Chamberlain Ave.  
Rockwood, TN 37854  
865-354-0855

**Elders:**

Dana Carter  
Kenneth Carter  
Don Chandler

**Deacons:**

Kendall Bear  
Larry Brackett  
Roger Carter  
Steve McCreary

**Minister:**

**Secretary:**

Susan Chandler

**Service Times:**

**Sunday**

Bible Study 10 am  
Worship Service 10:45 am  
Worship Service 6 pm

**Wednesday**

Bible Study 7:30 pm

**Email:**

rockwdcc@gmail.com

**Website:**

## IN THIS WORLD, NOTHING LASTS FOREVER

- ❖ New cars grow old.
- ❖ Clothes wear out.
- ❖ Roofs spring leaks.
- ❖ Windows crack.
- ❖ Appliances break.
- ❖ Batteries run down.
- ❖ Computers crash.

Our list could go on and on, for as another of Murphy's laws states, "Anything that can go wrong will go wrong."

In this world there is but one thing we can count on: God is good and His love endures forever, "*For the Lord is good and His love endures forever; His faithfulness continues through all generations.*" (**Psalm 100:5**).

Think about this:

- ❖ When your life is out of control...His love endures forever.
- ❖ When sin has you trapped...His love endures forever.
- ❖ When illness gets you down...His love endures forever.
- ❖ When anger has a hold on you...His love endures forever.
- ❖ When friends let you down...His love endures forever.
- ❖ When you need forgiveness...His love endures forever.
- ❖ When there is no where to turn for help...His love endures forever.

God's love is new and fresh and revitalizing every morning...every noon...every evening.

Rush Springs, OK**

## SOME QUESTIONS...

Here are some questions I would like answered by those who think creationists lack a brain and evolutionists have all the answers:

1. Why do the mosquitoes and flies trapped in amber that are supposedly millions of years old look exactly like the mosquitoes and flies of today? Shouldn't they have evolved in some way?

2. Did you know that during the 1960's there was a well documented finding in Utah of the fossilized imprint of what is clearly a sandal in rock that is supposedly 500 million years old? Why has this anomaly never been discussed and analyzed in scientific journals? By the way, this is only one of many such discoveries (i.e. human footprints alongside dinosaur tracks in the Paluxy river bed near Glen Rose, TX) that are simply ignored by the scientific community.

3. The skull of a so-called Neanderthal man was found in Rhodesia in the 1920's. What's interesting is this Neanderthal's skull has a clear bullet hole in it! The side of the skull opposite the bullet hole is blown out from inside – consistent with the effect of a bullet strike. What were Neanderthals doing shooting guns at each other?

4. It took scientists working with cutting edge computers years to analyze the incredibly complex human genome. There is still much about it that remains a mystery. Yet, we're supposed to believe this amazing genetic code just organized itself by accident?

5. Did you know that for your blood to clot, the concerted effort of more than twenty different glycoproteins is involved? And this only takes place after a multi-step process occurs at the wound site so the chemical process of the clotting can occur. Without this process working flawlessly in all of us, we would bleed to death from the smallest wound. How could such an incredibly complex procedure, involving multiple chemical interactions, evolve over time? The answer is simple. It couldn't. It's the reflection of an amazing design and Designer.

I truly think it takes more faith to not believe in God than to believe in Him!
